**Dell Inspiron One 2330 - Pentium G2020 2.9 GHz - 4 GB - 1 TB - LED 23 All in One Desktop**

## Product Descriptions

Dell's Inspiron One series of desktop computers is aimed at making the PC a full on entertainment centre, rather than a dull grey office tool, locked away from sight in the study.

Although Windows 8 and the touchscreen suggest you need to be sat close by to get the most out of the Inspiron One 2330, its Blue-ray drive and TV tuner ports suggest Dell is keen on the Inspiron 2330 being used as an entertainment platform, as well as a way of keeping spreadsheets up to date. The 23-inch screen, built in Blue-ray and 8GB of RAM and 2.8 GHz i5 processor makes it look good on paper.
