

## Product No. AUFE15

**Fender Passport 150 PRO**  
**Portable PA System**

## Product Details

Although care has been taken to ensure the accuracy of the information provided in this Product Specification, CTR is in no way liable for any errors, omissions or changes in specifications.

### Features

This 4-channel Fender Passport 150 PRO portable PA system is a full 3 pounds lighter than its predecessor, the Passport 150 system. Even so, it has an extra stereo channel (making it 2 totals) and has improved speaker voicing. Other features include 150W output, 2 mic/line inputs, and tilt tone control on each channel, level, reverb send, master volume, master tone, and more.

- ❖ Docking Connector for Passport Wireless Receiver
- ❖ Speaker systems feature tightly controlled coverage to minimize feedback
- ❖ 35mm (1-3/8") stand adapters are built in to each speaker cabinet
- ❖ Two speaker cables, and detachable power cable are included
- ❖ Mic and cable storage compartment with latching lid
- ❖ High Quality, Full-Range Speakers Appropriate for Events and Presentations
- ❖ Built-In 4-Input Mixer with full Pan and Volume Control per Mic/Line Channel

### Everything You Need In One Package

Containing a pair of speakers, a mixer, and the cables to connect them, everything you need to plug in is right here. Users attest to simple usability, and with two mono and two stereo inputs running through a 150 watt system, amplifying your music and sound has never been easier.

### Portable and Practical

Beyond the intuitive features and pristine sound quality of the Passport 150 Pro, the real hallmark of the series really comes down to the easy portability. The speakers snap into either side of the mixing console, which also houses all the cables to form a suitcase-like package. The whole system weighs in at a manageable 30 lbs-- a full 3 lbs lighter than previous generation of Passport-- and includes a sturdy carrying handle for easy transportation.

### Quality Sound Wherever You're Headed

Passport 150 Pro simply sounds great. With the newest generation of Passport, Fender has improved the voicing in the 5.25 woofer and dual 2.75 tweeters for tonal clarity and extreme balance.

## Product Descriptions

The Fender Passport P-150 portable sound system features a high-quality set of speakers with tight dispersion and excellent feedback rejection. Each cabinet houses a pair of full range 5.25" woofers.

This surprisingly lightweight system collapses into a grey, molded luggage-style case, and includes a 4-Input mixer with EQ, panning and volume controls. Fender has also installed a digital reverb that may be assigned to either the mains or individual channels.

The P-150 system operates on either 12 Volt DC power, or via the internal switchable AC power supply, providing true portability and enabling worldwide use. The P-150 is a value-laden and very affordable portable presentation and event solution, accommodating audiences of 75 to 125 people.
