

Product No. ACSPLO

Logitech X-140 5 Watts 2.0 Speakers

Product Descriptions

The X-140 Stereo Speaker System from Logitech offers crisp and clear stereo audio output. Designed to provide clear audio the speakers feature 2W output per channel. The speakers are ideally suited for use with a computer or MP3 player but are versatile enough to be driven by DVD players, televisions and game consoles. These speakers are a great option to use with your computer.

Dynamic, real-time bass equalization maximizes bass response while minimizing distortion. Ported subwoofer design displaces more air for deeper bass.

The control speaker hosts easy-to-reach tone and volume controls as well as headphone and auxiliary input jacks for the highest convenience.

Product Details

Although care has been taken to ensure the accuracy of the information provided in this Product Specification, CTR is in no way liable for any errors, omissions or changes in specifications.

Features

Stereo Output

Each speaker is driven by a 2.75" high-excursion driver and a 3" pressure driver, giving you stereo sound that can be easily connected to any audio device with an 1/8" (3.5 mm) stereo minijack output.

Headphone Jack and Auxiliary Input

A 1/8" (3.5 mm) stereo headphone jack is located on the front of one speaker allowing you to switch from speakers to headphones. A standard auxiliary input is also located on the front of a speaker.

Easy Controls

Volume and power controls are located on one of the speakers, letting you quickly and easily adjust the output and turn the speakers on or off. The controls are nicely integrated with the power switch included in the volume knob and the extra inputs on the front panel. The knobs turn easily without being too loose. The LED may be a bit bright in dark rooms. Enough cable is included around to suitably position the speakers on the desk around your computer.
