

Cyber X-Press Series

Cyber X-Press

Exclusive Patent Technology

The self-supported arms of Grandview's Cyber X-Press are specially designed to sustain pressure from any angle, thus allowing any screen position. It also allows the screen to retract slowly and safely with the push of a button at the handle base.

The Cyber X-Press Series is a similar screen to products of other brands, but due to the difference in the design of the self-support arms, Grandview's portable screens have an extra, important safety feature absent from other brands.

Product Features

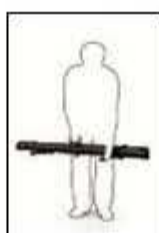

Single locking button mechanism allows for easy set-up and transportation.

Self-supported arms

3 Seconds for Whole Set-Up

Extend supporting feet

Pull screen up

Finish set-up
